Dust Extraction Systems

Many types of materials generate varying types of dust, dependent on the processes and materials used in the production environment. Some of these dusts can be hazardous, and some even potentially explosive - to keep your work space safe and healthy, careful consideration and planning should be applied when considering dust removal systems.

Make Integrated Air Systems Ltd your trusted dust control partner and we will do the rest. With experience in multiple industries, such as commercial print, corrugated card, beverage cans and many more, we are dedicated to our trade and ready to work with you.

Advantages of Using Our Dust Extraction Systems:

- **Protects Worker Health**
- **Reduces** necessary workspace **Cleaning**
- **Enhanced Quality** of machinery and reduction quality
- **Compliance with Health & Safety** guidance HSG258 / COSHH
- **Reduce the Risk of potential explosion**
- **Reduces** general machinery **maintenance and servicing**

Common Applications: Dust control filter systems are essential in any business where processes generate dust. such as Aluminium, corrugated card and lacquer dust.

Common Sectors: Beverage can and corrugated card industries.
